

Product Specification

Product information	Parameters			
Product name: Electrical Scooter Type: Outdoor Model: S3131 Maximum user weight: 125KG Motor power: 120W	Automatic Folding	One-touch automatic folding system with three adaptable modes for compact storage, easy carrying, and secure standby.	Motor	120w
	Built for Comfort	Featuring solid, shock-absorbing tires, this scooter guarantees a smooth, stable ride, no matter where you ' re headed—whether it ' s city streets or bumpy paths.		
	Replaceable carlight	improve the adaptability of the vehicle , and replace the lights according to the needs of the lights during the unknown period	Controller	Driving wheel
	Overall dimensions	980mm × 500mm × 825mm	Battery	24V, 5Ah x 2 lithium batteries
	Folded dimensions	248mm × 500mm × 660mm		
	Packing size	/		
	Net weight	/		
	Gross weight	23kg		
	Seat width	/		
	Seat depth	/		
	Front seat height	/	Charger	Match to the battery
	Backrest angle	/	Theoretica driving distance	15km
	Backrest height	/	Maximum speed	6km/h
	Head cushion above backrest distance	/	Horizontal road braking	/
	Head cushion height	/	Maximum safe slope braking	/
	Distance from footrest to seat	/	Static stability	/
	Footrest height off the ground	/	Dynamic stability	/
	Angle of footrest to seat surface	/	Slope standing performance	/
	Armrest height	/	Obstacle climbing	/
	Distance from front to back of armrest	/	Ground clearance	17cm
	Distance between armrests	/	Climbing angle	12°
	Rear wheel specification	Solid front and rear wheels	Minimum turning radium	≤1.5m
	Handrail diameter	/	Folding mechanism	Automatic folding/unfolding with remote control or manual folding
	Front wheel specification	Solid front and rear wheels	/	/
